**Check out our web site: [www.WGTCl.com/en](http://www.WGTCl.com/en)**

WG Thompson Consultants Inc. invites you to look around our site and discover how we can help you with all your computer and networking problems. We offer more than troubleshooting and can address just about any information technology need from custom programming to e-commerce projects. We have skilled technicians that can help you plan, design and implement Information Technology solutions for your company.

## **Target Groups**

WG Thompson Consultants Inc. offers a wide range of services that is growing and constantly changing with technology and business demands. We keep abreast of the latest technology and may offer advice and support in areas that are not listed in this site. When software and hardware problems hit the user community, we usually hear about them first because of our first hand-on consultant experience.

We evolved as a result of recognition that small to medium size businesses are the backbone of the economy (90% of all businesses) and recognized the need to supply computer support and maintenance services to this sector.

We have been involved in providing professional services for over 20 years.

As business owners ourselves, we understand the requirements of other business owners and see the efficient use and support of information technology resources as being one of the keys to success.

Below you will find a list of some of the regular services we supply. If you have a problem that does not fit neatly within a category, then contact us to discuss.

## **Corporations**

Large businesses require the support of IT professionals but sometimes they do not have the appropriate skill set available internally. It can be cost effective to use our services to supplement or independently audit for plans, developments and decisions. Before you go out and spend that well earned money on hardware and software that you may not need, contact us so that we can help you through the process. We do not keep an inventory of hardware or software so we have no vested interest in guiding you to buy items that we have in stock.

## **Small Business Owners**

Small businesses and those that work out of the home very often require the support of a professional IT when making plans and computer decisions. Before you go out and spend that well earned money on hardware and software that you may not need, contact us so that we can help you through the process. We do not keep an inventory of hardware or software so we have no vested interest in guiding you to buy items that we have in stock.

## **Home Users**

Small businesses and those that work out of the home very often require the support of a professional IT when making plans and computer decisions. Before you go out and spend that well earned money on hardware and software that you may not need, contact us so that we can help you through the process. We do not keep an inventory of hardware or software so we have no vested interest in guiding you to buy items that we have in stock.

## **Investors and Groups**

Are you a business investor or group that is considering investing in a technical startup or IPO. Would you like an independent technical opinion of their product(s) and their competition in the current marketplace?
